PRASHANT KUMAR RAI

Software Engineer | Node.js | React.js | REST APIs | MongoDB | QA & API Testing
Indore, Madhya Pradesh, India | +91 6206875360 | prashantraimittal@gmail.com
Portfolio: raiprashantmittal.github.io/Prashant-Kumar-Rai-Portfolio
LinkedIn: linkedin.com/in/prashantkumarrai10112001 | **GitHub:** github.com/raiprashantmittal

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience across development and software testing. Built Node.js, Express.js, and MongoDB backend services and cut API response time by 35% through indexing and query optimization. Currently a Software Quality Tester running functional, regression, integration, API, and UAT testing on EyeOnTask, a field service management platform. Experienced with JWT authentication, RBAC, AWS S3, and AI-assisted development (GitHub Copilot, Claude Code). Pursuing an M.Tech in Computer Engineering at SGSITS, Indore. Seeking Associate Software Engineer, Software Developer, or QA / SDET roles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++
Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, Middleware Design
Frontend: React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS
Databases: MongoDB, Mongoose ODM, MySQL, Query Optimization, Indexing
Testing & QA: Functional, Regression, API, and Integration Testing, UAT, Test Case Design, Bug Reporting, Requirement Traceability Matrix, Postman
Cloud, Tools & AI: AWS S3, AWS IAM (basics), Firebase, Docker, Git, GitHub, Multer, GitHub Copilot, Claude Code, Groq API
Core Concepts: RBAC, SDLC, Agile/Scrum, OOP, Data Structures & Algorithms, Secure Coding

PROFESSIONAL EXPERIENCE

Software Quality Tester | Aplite Info Solutions, Indore, Madhya Pradesh **Jun 2025 – Present**

- Design and execute test plans and test cases across functional, regression, integration, and user acceptance testing (UAT).
- Perform API testing and validate backend business logic, using MERN stack knowledge to identify service-layer defects.
- Test end-to-end business workflows on EyeOnTask, a web and mobile field service management platform.
- Track defects through their lifecycle with developers in Agile sprints; maintain requirement traceability matrices for coverage and audit readiness.

Node.js Developer | AppnWeb Technologies, Jaipur, Rajasthan **Jul 2023 – Aug 2024**

- Developed and maintained backend services using Node.js, Express.js, and MongoDB for production web applications.
- Improved API response time by 35% through MongoDB indexing, query optimization, and efficient middleware design.
- Worked on the Vikaki Learning Management System as a frontend developer (AWS S3 file storage, JWT-based RBAC for students, instructors, and administrators).

Web Development Intern | QTN Global Services, Alwar, Rajasthan **Aug 2022 – Feb 2023**

- Contributed to REST API enhancements and backend module improvements to support application reliability.
- Applied data structures and algorithms to optimize business logic; used Git, SDLC, and Agile workflows.

PROJECTS

CodeForge – AI-Powered Developer Platform (solo founder and developer) | *React.js*, *Vite*, *Monaco Editor*, *Node.js*, *MongoDB*, *Docker*, *Groq API*, *JWT*

- Platform combining coding practice, real-time code execution, AI mentorship, progress tracking, gamification, contests, and mock interviews.
- Multi-language execution engine (Docker + Piston) with hidden/visible test cases; AI Mentor (Groq API); XP, badges, streaks, and leaderboards.
- Owned MongoDB architecture, authentication, React frontend, and deployment.

EyeOnTask – Field Service Management Platform (Aplite Info Solutions) | *Functional*, *Regression*, *API Testing*, *UAT*

- Tested business workflows and validated functionality of a web and mobile app covering jobs, scheduling, contracts, invoicing, and inventory (Client → Request/Quote → Job → Fieldworker → Invoice → Payment → Reports).

Healthcare Management System | *Node.js*, *React.js*, *MongoDB*, *JWT*, *REST APIs*

- Role-based application for patients, doctors, and administrators, using JWT authentication and authorization middleware to control access.

Fake News Detection using LSTM | *Python*, *TensorFlow*, *Keras*, *NLTK*, *Scikit-learn*

- LSTM-based binary text classifier with stemming, tokenization, and sequence padding; approximately 95% classification accuracy.

EDUCATION

M.Tech, Computer Engineering | Shri Govindram Seksaria Institute of Technology & Science (SGSITS), Indore **Pursuing**
B.Tech, Computer Science Engineering | Institute of Engineering & Technology (IET), Alwar, Rajasthan | GPA: 8.2/10.0 **2023**

CERTIFICATIONS

NPTEL – C++ Programming (IIT Certification) | Walmart – Advanced Software Engineering Virtual Experience Program
